DRAFT 12/1/22

EPA R6 to provide update on LANL Electrical Power Capacity Upgrade (EPCU) proposed new powerline upgrade. Provide update at R6 RTOC meeting	(On-going) Per DOE/LANL, the EPCU project includes a power line and upgrades to existing infrastructure; involves multiple agencies incl. USFS and BLM. LANL indicated that additional potential transmission line routes are being considered for analysis in the Environmental Assessment. LANL contact Kristen Dors 505-667-7014
EPA R6 provide updates at R6 RTOC meeting on LANL Site Wide Environmental Impact Statement (SWEIS)	(On-going)
EPA R6 to provide update on LANL tritium venting	(On-going) Provide update at R6 RTOC meeting: On-going discussions between the DOE/LANL and R6
EPA R6 to describe permitting process of transuranic waste facility (Pueblo of San Felipe)	(On-going) Provide update at R6 RTOC meeting: We were not able to get clarification on what this topic refers to, but if it is about the LANL project RLWTF (radioactive liquid waste treatment facility), it was submitted in 2021 and approved in 2022 April after tribal consultation was completed and comments were addressed. Construction of the new facility, to replace the old treatment facility, has begun.
EPA R6 to provide information on radiation management program (Pueblo of Isleta)	(On-going) Action item status is that the consultation is pending due to U.S. Department of Energy's availability being affected by wildland fire. Among the Pueblo's concerns is LANL's radiation management program to include concerns about detecting a release, the extent of monitoring, and location of permanent storage of radioactive waste.
